## CAR STUD AND HUB CLEANING TOOL **MSH-C1**

- The toughest 2in1 stud and hub cleaning tool on the market.
- Heavy-duty stainless-steel brushes easily remove rust and corrosion from the studs.
- Long lasting abrasive pad cleans up to 800 car hubs.
- Made in one-piece. No replacement parts required. No parts falling off.
- Removes rust from the rotor, hub, studs and the back of the wheel without damaging the surface.
- Compatible with ½" (12,7 mm) impact wrench.

**NO MORE PARTS  
FALLING OFF**

**The Checkpoint Cleaning Tool  
will last way longer than  
anything else on the market.**

The Checkpoint Stud and Hub Cleaning tool quickly and effectively removes rust, corrosion and dirt from cars, SUVs and light trucks' rotors, hubs, studs and the back of the wheels. This helps to ensure the secure fitment of wheels and wheel nuts to minimise the risk of a wheel detachment. It also prevents the hub from running off center leading to vibrations, accelerated wear and tear on bearings and other components.
