# High Precision Tyre Balancing

Here's one way to trim the weight out of your operations. With magnum+ High Precision Balancing Beads, you can simplify your process, speed up your daily routine and turn a time-consuming repetitive task into a genuine profit centre. It's just the simplest, easiest, most-cost effective way to balance tyres for their entire life. Now that's efficiency.

## Internal Balancing Changes The Game

- Automatic balancing in less than 5 seconds.
- Lasts for the entire life of the tyre.
- Continuously adapts to the new heavy spots that form around the tyre.
- Turns balancing into a hassle-free profit centre.
- No balancing equipment or maintenance required.

## magnum+ Changes The Game

- The largest, most even, roundest and long-lasting beads on the market.<sup>1</sup>
- The lowest vibration vs. speed ratio.<sup>1</sup>
- Proven to never affect tyre structure or wheel assembly.<sup>2</sup>
- The only internal balancing compound in the world that passed the load/speed endurance test according to ECE-R54.<sup>2</sup>
- TPMS compatible.

1. According to a 2020 performance report outlining results from tests and analysis made by Dr. Alexander Wölfel.

2. According to a 2020 performance report outlining results from tests made in Germany by world-renowned automotive certification company.

## Case

- Case of individually packaged toss-in bags.

## Fleet Tub

- Fleet tub of toss-in bags.
- Ideal for fleets, simply pick the bag from the tub and toss it in the tyre.

## Bulk Tub

- Bulk tub of loose beads.
- Format of 8 kg.
